EDUCATION

University of Western Ontario | London, ON, Canada **May 2028**

B.S. (Honours) in Computer Science

- **Courses:** Object Oriented Programming, Data Structures & Algorithms, Computer Organization and Architecture, Software tools and Systems programming

TECHNICAL SKILLS

Languages: English, French, Arabic
Programming Languages (ordered by proficiency): Python, Java, C, Assembly(ARM/X86), HTML, CSS
Systems & OS: Linux (Ubuntu, Kali, GAUL), Bash, Process & Memory Fundamentals
Cloud & Security: AWS Fundamentals(Lambda, S3, IAM), Web Recon (FFUF, Gospider, GAU)
Tools and Web & Networking Fundamentals: Git, GitHub, VS Code, IntelliJ, PowerShell, HTTP, SSL Fundamentals **Finance:** Financial Modeling(3 Statement Model), Discounted Cash Flow (DCF), LBO, MS Excel

RELEVANT EXPERIENCE

Mada Communications International | Internship (OnSite) **May 2025 - Aug 2025**

CyberSecurity Penetration Testing Intern

- Performed web-app recon using ffuf, gospider, Nmap & gau to enumerate hidden endpoints, finding 12 new attack surfaces
- Assisted in identifying and exploiting vulnerabilities in web applications, internal/external networks, and system infrastructures.
- Developed and maintained automated Python scripts to streamline and ease vulnerability detection and reporting processes.
- Collaborated with senior pentesters to document findings, reproduce exploits, and propose mitigations

PROJECTS

Subdomain Enumerator | CyberSecurity Internship **May-Dec 2025**

- Built a modular subdomain enumeration and recon pipeline using Python, GAU, FFUF, and GoSpide
- Optimized enumeration with concurrency and deduplication, reducing runtime by ~40
- Containerized and deployed the pipeline as an AWS Lambda function with S3 artifact storage and CloudWatch logging.

Cyma by Mada Report Generator **July 2025**

- Developed a Python script that ingests pentest findings (JSON/CSV) and outputs polished HTML/PDF reports with sections for “Issue,” “Severity,” and “Exploitability.” and many more.
- Integrated drag-and-drop evidence handling and automated bold formatting for key fields.
- By integrating this Report Generator for a 30 Page report, saved the team ~70% of their time just by using it.

Western Developers Society Hackathon: SmartCart AI Grocery Mobile App | 2nd Place **March 2025**

- Built a React Native mobile app using Google Cloud Vision API to recognize grocery items from images and manage cart checkout
